Contact No.+91-7524979428; **email :** rishi.ku.sharma80@gmail.com

Web portfolio: https://rishi-kumar-sharma.vercel.app/

LinkedIn: www.linkedin.com/in/rishi-k-sharma-6b786911

- 15 years of experience, including the last 5 years working as an Agile Scrum Master | Senior Scrum Master | Agile Delivery Lead || 8+ Projects Delivered | PSM-I | ERP | CRM | DevOps| Digital Transformation
- Strong expertise in stakeholder management, SLA-driven delivery, sprint planning, risk mitigation, operational planning, and process optimization, combined with hands-on exposure to Jira, Agile Scrum methodologies, and DevOps fundamentals.
- Demonstrated success in driving operational efficiency, coordinating cross-functional teams, and delivering technology-enabled transformation initiatives aligned with business objectives.

Core Competencies & Skill

Agile Project Management || Scrum Methodology || DevOps Fundamentals || Jira Administration & Task Management

Team Leadership || Web & Mobile Application Deployment || ERP Solutions || Network & Infrastructure Management

Training & Team Coordination || Strategic Leadership || Asset Management || Inventory Management

Stakeholder Communication || MS Office Suite

Carrier Highlights

- Awarded Vodafone IMAD (I Made A Difference) Award for outstanding contribution to network operations and service delivery excellence.
- Recognised as Best Zone Technical Manager (ZTM) for operational leadership, team management, and performance excellence.
- Successfully transitioned from Telecom Network Operations and Service Delivery into Software & IT Project Management.
- Coordinated ERP, CRM, logistics, and web/mobile application projects using Agile Scrum methodologies and Jira workflow management.
- Managed cross-functional teams including developers, QA teams, vendors, and operational stakeholders to ensure successful project execution and timely delivery.
- Played a key role in requirement gathering, stakeholder communication, workflow planning, sprint coordination, and issue resolution activities.
- Contributed to process optimization, workflow automation, and digital transformation initiatives to improve operational efficiency and productivity.
- Managed SLA-driven operations, escalation handling, risk mitigation, and service delivery coordination across multiple projects.
- Supported cloud hosting, deployment coordination, API-integrated platforms, and infrastructure-related operational activities.
- Received multiple appreciation awards and recognitions for meeting project deadlines, operational targets, and maintaining service quality standards.
- Participated in Kaizen process improvement initiatives and continuous operational enhancement programs.

- Completed professional training in Height Safety & Rescue Operations, PPE/OHS Safety, First Aid, and Emergency Preparedness.

|| Career Journey ||

King Security Guards Services Pvt. Ltd., Lko.|| Agile Scrum Master - Project Manager|| Aug 2024 – Present

Key Responsibilities:

- Collaborating closely with the Product Owner, stakeholders, development team, and technical architect to define the solution and drive progress.
- Applied Agile methodology to drive continuous improvement, enabling the successful development and deployment of ERP module features with incremental releases and accelerated delivery timelines
- Proactively identifying and resolving impediments faced by the product owner and development team to mitigate risks in project deliverables
- Coaching teams in Agile practices and providing necessary training to create a positive mindset towards Agile methodologies
- Implementing Scrum framework - Kick-offs, sprint 0, sprint planning, daily scrums, backlog refinement, sprint reviews, and sprint retrospectives.
- Effectively utilised negotiation skills to resolve blockers.
- Helped the team in arriving at work estimates, capacity planning and story points.
- Served as Scrum Master for two Scrum teams consisting of 14 members.
- Implemented Kanban framework for services team to improve the TAT and manage workflow, resulting in faster resolution of tickets.

ERP (Enterprise Resource Planning)

Designed and contributed to the development of an end-to-end ERP (Enterprise Resource Planning) solution to streamline and automate organizational operations across multiple departments.
The system was focused on improving operational efficiency, centralizing business data, and enabling seamless integration between various business functions.

ERP Modules Included:

- Tender Management
- Human Resource Management (HRMS)
- Financial & Accounts Management
- Billing & Invoicing
- Supply Chain Management (SCM)
- Operations Management
- Legal & Administrative Processes

Key Responsibilities:

- Requirement gathering and business process analysis
- Coordination with stakeholders and department teams
- Workflow planning and process documentation
- ERP module planning and implementation support
- Data flow analysis and operational optimization

The project aimed to reduce manual processes, improve inter-department collaboration, enhance reporting accuracy, and increase overall business productivity through centralized digital operations.

OBHS (On Board Housekeeping Services)

Developed and coordinated an On Board Housekeeping Services (OBHS) mobile application designed to improve cleanliness and passenger service management in trains through real-time complaint handling and housekeeping staff coordination.

Key Features & Functionalities:

- Passenger complaint registration
- Housekeeping task assignment and tracking
- Real-time staff location monitoring
- Mobile app for housekeeping staff
- Supervisor dashboard and monitoring
- Service request status tracking
- Performance reports and analytics
- Push notifications and service alerts
- Digital inspection and feedback management
- Photo upload for task completion proof
- Cloud-based data synchronization
- Role-based user access and security

Key Responsibilities:

- Requirement gathering and workflow analysis
- Coordination with stakeholders and development teams
- Sprint planning and Agile project tracking
- Housekeeping process optimization
- Mobile application feature coordination
- User Acceptance Testing (UAT) support
- Issue tracking and resolution management
- Documentation and progress reporting

Project Outcome

The OBHS platform streamlined onboard housekeeping operations, reduced complaint resolution time, improved service transparency, enhanced staff productivity, and increased passenger satisfaction through digital workflow automation

Language – C# | Front -end - Blazer | API – ASP.NET Core | App - Android
Data Base – My SQL

Strivemindz Pvt. Ltd., Jaipur || Scrum Coach – Service Delivery || Jun 2022 – Nov 2023

Key Responsibilities:

- Facilitated daily Scrum meetings, fostering open communication and ensuring alignment within the team.
- Ensured comprehensive Scrum training for all team members, promoting continuous learning and skill development.
- Facilitated Sprint reviews to receive faster feedback from users to improve project deliverables with required changes, fostering openness.
- Provided coaching to teams in Estimation techniques, fostering Adaptability and change management.
- Handled client communication regarding project updates, feedback, reviews, and requirement discussions.
- Supported sprint planning, sprint tracking, and project execution activities to ensure timely delivery.
- Managed Jira tasks, team coordination, and progress monitoring across multiple software projects.
- Managed software projects using both Waterfall and Agile methodologies, ensuring successful planning, execution, and on-time delivery.

Projects developed under my supervision

CRM (Customer Relationship Management)

Developed and contributed to a CRM (Customer Relationship Management) platform designed for distributors and sales teams to efficiently manage customer interactions, vendor operations, product management, and sales activities through a centralized system.

The CRM application was integrated with the SAGE API to enable seamless synchronization of vendor information, product catalogues, inventory details, and pricing data from the SAGE database.

Key Features & Functionalities:

- Distributor-based user management with team creation and role-based access
- Vendor onboarding and management through SAGE API integration
- Real-time product synchronization from the SAGE database
- Client and customer relationship management
- Dynamic presentation builder for distributors to create client presentations
- Product selection and quotation management
- Multiple custom form creation for workflows, approvals, and data collection
- Centralized dashboard for managing distributors, clients, vendors, and products
- Workflow automation to improve sales and operational efficiency

Key Responsibilities:

- Requirement gathering and business process analysis
- CRM module planning and implementation coordination
- API integration support with SAGE platform
- User process optimization and operational enhancement
- Data flow management and testing support
- Coordination with development and stakeholder teams

Project Outcome:

The CRM system streamlined distributor operations, improved customer engagement, centralised sales and product management processes, and enhanced overall operational productivity through automation and integrated business workflows.

Front-end – React.js, Next.js | Back-end – Node.js |
Website – https://crm.promoxcrm.ai

Sayiq User & Driver App (Qatar)

Contributed to the coordination and management of a logistics and service delivery mobile application designed to connect service providers with customers for package transportation and fleet management operations.

Key Features & Functionalities:

- The platform enabled users to request delivery services for small, medium, and heavy packages across short and long distances, including vehicle booking options such as trucks and vans for large goods transportation.

- The application included functionalities such as real-time order tracking, delivery request management, vehicle booking, customer and driver management, fleet registration, scheduling coordination, location tracking, and service status monitoring.

- Supported operational workflows for fleet owners to register and manage trucks/vans, optimise delivery schedules, and increase business opportunities through additional order allocation.

Key Responsibilities:

- Requirement gathering and business process analysis
- App module planning and implementation coordination
- User process optimisation and operational enhancement
- Testing support
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including sprint planning, task tracking on JIRA

Front-end – Laravel **|** Mobile App - Flutter **|** Back-end - Laravel **|**

Project Outcome:
Logistics and delivery platform enabling users to book vehicles, transport goods, and manage fleet operations with real-time tracking.

Tag Mix

Coordinated and managed communication across cross-functional teams for an audio streaming and event synchronization platform integrating venue devices, cloud services, APIs, and consumer applications.

Key Features & Functionalities:

- Audio Streaming
- Metadata Synchronization
- Cloud Integration
- API Coordination

Key Responsibilities:

- Requirement gathering and daily MoM updating
- Daily task tracking & update
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including task tracking on JIRA
- Acted as a liaison between development teams, stakeholders, API integration teams, and operational units to streamline project execution and technical communication.

Project Outcome:

Successfully coordinated the delivery of a multi-platform audio streaming solution, improving system integration, stakeholder collaboration, and real-time synchronization across cloud, API, venue, and consumer application environments.

Stock Market Simplified

Contributed to the coordination and management of a web and mobile-based e-learning platform that enabled users to register, explore, and enrol in live and recorded webinars, online courses, and mock tests through free and paid subscription models.

Key Features & Functionalities:

- **Developed a web and mobile learning platform** enabling users to register, browse, and enrol in webinars, courses, and mock tests.
- **Implemented live and recorded learning modules** with support for both free and paid content access.
- **Integrated payment management** for purchasing premium webinars, courses, and recorded sessions.
- **Built user engagement features** including ratings, reviews, course tracking, and content accessibility.
- **Designed a comprehensive admin panel** for managing users, speakers, content, payments, reviews, and platform operations

Key Responsibilities:

- Requirement gathering and business process analysis
- Module planning and implementation coordination
- User process optimization and operational enhancement
- Testing support
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including sprint planning, task tracking on JIRA

front-end – React.js | App – Native Technology (Android/iOS)| Back-end – Node.js|

Project Outcome:

Successfully delivered an end-to-end e-learning platform that increased accessibility to educational content, streamlined content management, and enabled monetization through paid webinars and courses.

Prsy:

Contributed to the planning and development of a mobile application designed for NEET aspirants to improve study management, revision tracking, and learning productivity.

Key Features & Functionalities:

App features include study scheduling, task management, progress-tracking dashboards, revision reminders, and scientifically planned topic scheduling to enhance retention and learning efficiency.

A student-focused learning platform enabling users to manage daily study activities, monitor progress, and improve revision consistency through automated alerts and scheduling mechanisms**.**

Key Responsibilities:

- Requirement gathering and business process analysis
- App module planning and implementation coordination
- User process optimisation and operational enhancement
- Testing support
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including sprint planning, task tracking on JIRA
- Developed a study planner algorithm that schedules new lessons, manages spaced revisions, and automatically reschedules missed topics to ensure continuous learning progress.

Mobile App- Flutter **||** Back-end -Laravel

Project Outcome:
Study planner with Revision & New learning scheduler for NEET aspirants

Tanga Trip

Contributed to the development and coordination of a vehicle booking platform enabling users to enquire and book cars for travel while allowing vendors and drivers to list vehicles and manage customer enquiries.

Key Features & Functionalities:

- A vehicle rental connectivity platform enabling users to search registered rental vehicles based on travel requirements, comfort, and preferences.

- Implemented inquiry management and driver matching, allowing registered drivers to receive, review, and respond to booking requests.

- Facilitated direct user-driver communication for trip discussions and price negotiation, while the platform serves solely as a lead-generation and connectivity solution.

Key Responsibilities:

- Requirement gathering and business process analysis
- App module planning and implementation coordination
- User process optimisation and operational enhancement
- Testing support
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including sprint planning, task tracking on JIRA

Front-end – Laravel **|** Mobile App- Flutter **|** Back-end - Laravel **|**

Project Outcome:
A rental vehicle marketplace that connects customers with registered drivers, enabling vehicle discovery, inquiry management, and direct communication for booking discussions outside the platform.

Website Projects -

Managed website projects from planning to deployment, ensuring responsive design, performance optimization and modern UI/UX implementation.

Key Features & Functionalities:

- Implemented CMS-based solutions for efficient content management and website updates.

- Dynamic website features including animations, sliders, forms, and enhanced user engagement functionalities.

- Ensured mobile responsiveness and cross-browser compatibility across desktop, tablet, and smartphone devices.

- Worked on corporate website structures including Home, About Us, Services, Portfolio, Clients, Testimonials, FAQs, Gallery, and Contact modules.

Key Responsibilities:

- Requirement gathering and business process analysis
- Design finalisation and implementation coordination
- Testing support
- Coordination with development and stakeholder teams
- Managed Agile coordination activities including sprint planning, task tracking on JIRA

Project Outcome:
Website developed under my supervision and project coordination.

Nokia Networks India Pvt. Ltd. || Cluster Team Lead (JG8) | Jan 2016 – Sep 2018
Key Responsibilities:

• Worked as a Quality Lead in the central operations team focusing on Voice & Data KPI improvement across the telecom network.
• Coordinated with Energy/Infrastructure vendors and BSS teams to maintain network uptime, reduce MTTR, and support special infrastructure initiatives.
• Performed weekly in-depth analysis of infrastructure outages and shared corrective action plans with vendors and cluster teams for performance improvement.
• Managed field maintenance processes, preventive maintenance activities, and corrective support for third-party telecom equipment.
• Improved network KPIs by minimizing LIB, LCV, worst cell cases, and service-affecting alarms through daily analysis and optimization planning.
• Reduced network outages and flick site counts through alarm monitoring and root cause analysis.
• Improved Voice KPI by resolving BL_TRX cases and optimizing network performance.
• Supported DATA KPI improvement through E1 additions, throughput enhancement, and transmission optimization activities.
• Performed TRX addition/deletion activities for network decongestion and traffic balancing.
• Coordinated vendor management activities for O&M operations including theft recovery, burnt site restoration, and infrastructure maintenance.
• Monitored preventive maintenance activities for UPE network operations and supported MW transmission LOW RSL improvement initiatives.

Telenor India Pvt. Ltd. || Zone Technical Manager (Senior Executive) || Jun 2014 – Dec 2015
Key Responsibilities:

• Coordinated with IP vendors for closure and sign-off of daily, weekly, and monthly network outages.
• Managed Energy/Infrastructure vendors and coordinated with BSS teams to maintain network uptime and reduce MTTR.
• Conducted weekly in-depth analysis of infrastructure outages and shared improvement plans with infrastructure providers and cluster teams.
• Managed LNOC operations including fault management, preventive maintenance, change request handling, and process adherence.
• Handled fault escalation, early restoration activities, incident reporting, and outage analysis to ensure network availability.
• Maintained QoS, network availability, and operational KPIs above benchmark levels through continuous monitoring and optimization.
• Supported transformation initiatives, policy compliance, cost optimization, and capacity management activities.
• Coordinated with IP/MSP teams to improve network availability, minimize downtime, and enhance service restoration efficiency.

• Managed project rollout activities including RF survey, TX survey, infrastructure readiness, BTS implementation, integration, and acceptance testing coordination.

• Initiated and implemented cost-saving ideas, resource optimization strategies, and operational improvement initiatives.
• Managed operational databases, reporting activities, and business performance tracking.
• Conducted weekly and monthly reviews with partners and business teams regarding operational targets, issues, and improvement plans.
• Liaised with local administrative authorities, regulatory bodies, and external agencies for operational and project-related activities.
• Managed telecom assets and ensured proper maintenance and safeguarding of organizational infrastructure.
• Performed transmission complaint analysis, KPI monitoring, radio report analysis, and corrective action planning for network improvement.
• Coordinated preventive and corrective measures for repeated site outage cases with infrastructure and managed service partners.
• Conducted periodic drive tests, retailer visits, and customer feedback analysis to identify opportunities for network optimization and expansion.

NOKIA SOLUTIONS AND NETWORKS ||Senior Support Engineer || May 2007 – Jun 2014
BSS Tier-2 Support || Mar 2013 – Jun 2014
Key Responsibilities:
• Managed maintenance and operations of Nokia BSC infrastructure for Vodafone UP East network with coordination of field maintenance teams.
• Performed software/hardware upgrades, capacity expansion, OSS over IP, GB over IP configuration, and BSC implementation activities.
• Troubleshot critical BSS faults and handled KPI-impacting incidents, emergency outages, and network quality issues.
• Coordinated with NOC, care teams, and field engineers for early restoration and RCA submission during critical outages.
• Executed O&M activities including BTS upgrades, BINOS upgrades, optical connectivity, synchronization, and network optimization tasks.
• Conducted BSS parameter audits, preventive maintenance, backup management, and infrastructure escalation activities.

BSS Engineer || Mar 2008 – Feb 2013
Key Responsibilities:
• Managed O&M activities for BSCs and BTS sites across the Allahabad Zone.
• Worked on commissioning, testing, operation, and maintenance of Nokia 2G/3G BTS infrastructure.
• Handled site creation, TRX addition/deletion, re-homing, dual-band implementation, and alarm rectification activities.
• Supported transmission and network optimization activities including E1 routing, PDH/SDH shifting, and loop formation.
• Coordinated with project, planning, transmission, and infrastructure teams for smooth network rollout and maintenance operations.
• Performed outage analysis, RCA preparation, KPI monitoring, and preventive action planning to improve network availability.
• Managed vendor coordination, infrastructure reviews, and material/inventory management activities.

Network Engineer – Electrical || Jul 2007 – Feb 2008
Key Responsibilities:
• Managed manpower, material, and infrastructure operations for BSC and BTS sites across the Jhansi zone.
• Handled maintenance and upgrades of DG sets, power plants, electrical infrastructure, and network support systems.
• Coordinated with vendors and field teams for network rollout, site acceptance, preventive maintenance, and outage resolution.
• Managed MIS reporting, fuel optimization, inventory tracking, OPEX control, and MTTR improvement initiatives.

OMCR Engineer || May 2007 – Jul 2007
Key Responsibilities:
• Monitored Vodafone UP East network infrastructure including BSCs and BTS sites.
• Generated maintenance reports, monitored network availability, and coordinated with field teams for fault resolution and network performance improvement.

Ericsson India Pvt. Ltd. || OMCR Engineer|| Mar 2006 – Apr 2007
Key Responsibilities:
• Monitored network alarms and provided BSS support for Airtel UP East network operations.
• Coordinated with field engineers and installation teams for network fault resolution and optimization support.

Samsung India Pvt. Ltd. || HHP Engineer|| Jun 2004 – Feb 2006
Key Responsibilities:
• Performed diagnosis, troubleshooting, and repair of Samsung mobile devices under warranty and service programs.
• Managed end-to-end warranty repair processes, ensuring timely service delivery and customer satisfaction.
• Maintained inventory and tracking of spare parts to support efficient repair operations.
• Conducted technical inspections, fault analysis, and quality checks to ensure compliance with service standards.
• Coordinated with service centres and internal teams for repair status tracking and issue resolution.

Richi India Ltd. || Service Engineer|| Jan 2003 – Apr 2004
Key Responsibilities:
• Provided installation, preventive maintenance, troubleshooting, and repair services for Ricoh photocopier machines across the Prayagraj territory.
• Managed warranty, Annual Maintenance Contract (AMC/4C), and out-of-warranty service requests, ensuring timely issue resolution.
• Conducted on-site technical support, fault diagnosis, and component replacement to maximise equipment uptime.
• Maintained service records, customer support documentation, and spare parts coordination.
• Built strong customer relationships through prompt service delivery and technical assistance.

TATA Engineering (TELCO) || Apprentice Trainee|| Dec 2001 – Nov 2002
Key Responsibilities & Learning:

- Underwent hands-on industrial training in manufacturing and production operations within a large-scale automotive engineering environment.
- Gained practical exposure to assembly line processes, production planning, and manufacturing workflows.
- Learned fundamentals of Supply Chain Management, inventory movement, and material handling processes.
- Participated in Kaizen and continuous improvement initiatives focused on operational efficiency and productivity enhancement.
- Developed an understanding of quality control, process optimization, workplace safety, and industrial best practices.

|| Trainings & Certifications ||

- Professional Scrum Master (PSM-|) Course Completion Certificate – PSM-1
- DevOps Engineer Course Completion Certificate- Star Agile
- BSC & BTS Maintenance and Alarm Rectification – NSN
- Flexi Packet Training – NSN
- CCNA Training – NSN
- OHS Security & First Aid Training -
- Nokia 2G Marshal Operations & Maintenance - NSN
- NEC Transmission Equipment Maintenance - NEC
- MPLS Network Training – Huawei

|| Educational Qualifications ||

- Diploma in Electrical Engineering – Government Polytechnic, Lucknow (UPBTE) | 2001 | 76.25%
- Intermediate (HSC) – S.C. Das K. Lal Inter College, Allahabad | 1998 | 59.60%
- High School (SSC) – S.C. Das K. Lal Inter College, Allahabad | 1996 | 60.33%
